

Jandel Engineering Limited

Jandel System for Ingots and Pot Scrap

Jandel Engineering Limited offers the HM21 Test Unit in combination with a rugged plastic guided probe head as a solution for making measurements of rough surfaced items such as ingots and pot scrap. This probe head is available only with the HM21 and for the purposes outlined above. The system is intended for sorting materials where the need for accuracy is low.

Further information can be obtained using the contact details below.
